

TRADE OF GOODS DECLARATION / INTRASTAT

Companies carrying out trade of goods within the European Union are subject to the Trade of Goods Declaration (DEB) / Intrastat. The same applies for companies delivering services, they are subject to the European Services Declaration (DES).

EUROPEAN SERVICES DECLARATION

For any intracommunity service delivery, a company has to establish a European Services Declaration (DES).

INTRASTAT

In Europe (apart from France), the word Intrastat is used.

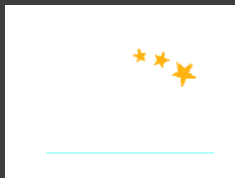

TRADE OF GOODS DECLARATION

In France, Trade of Goods Declaration (DEB) is used to talk about the monthly declaration resuming intracommunity exchanges.

INTRASTAT / DECLARATIONS THRESHOLDS

When talking about trade exchanges in the European Union, we design by the term Arrival the entry of goods, and by Dispatch, the sending of goods, between two countries. The Intrastat / Trade of Goods Declaration recapitulates all arrivals and dispatches done with other companies established in one of the European Union's countries. This declaration is mandatory if the amount of the purchase or the selling exceeds the threshold. Pay attention, these thresholds are different in each country.

PROCESSING CENTER TRADE OF GOODS DECLARATION / INTRASTAT

ASD Group is specialized in handling trade of goods declaration / Intrastat and European Services Declaration (DES). Our teams analyse, work and declare thousands of invoices. A department dedicated to DEB / DES / Intrastat is at your service to take charge of your declarations.

INTRACOMMUNITY FLOW EXAMPLE TRADE OF GOODS DECLARATION RULES

A French company purchases goods from a German company and delivers them to an Italian company. How to handle a Trade of Goods declarations ?

This case is frequently faced by expert accountants. We can identify 3 subjects to tax in 3 different countries. This is a simple triangular trade. The French company has to file a dispatch trade of goods declaration under regim 31 with its French VAT number to the Italian VAT number of the recipient.
