When partnering with ASD Canada, take advantage of our many specialists working in complementary domains. ASD Canada will cater for your clients' needs by offering them flexible and personalised solutions allowing you to better accompany them throughout their expansion.

CANADA

ASD Group ensures your complete compliance with Canadian customs and fiscal laws. Let us guide you towards the best value-added solutions for your business, with the following services:

■ DISTRIBUTION

Centralize your administrative obligations with one service provider. As a distributor, ASD Group takes care of importing and distributing your merchandise to your Canadian clients, in your name. This eliminates the need to create a local franchise as well as the need to realise fiscal formalities and local customs yourself. Furthermore, we manage the billing and collect payments on your behalf.

■ FISCAL REPRESENTATION

Become a non-resident importer to Canada in order to sell directly to your clients, all taxes included, without creating a local company. ASD Group will be the intermediary between the local fiscal administration and yourself, allowing us to complete the obligatory declarations of your commercial operations. Offer your clients a complete solution while remaining competitive.

■ COST REDUCTION & SUPPLY CHAIN OPTIMISATION

Improve the organisation of your supply chain management while reducing costs related to the logistical process. Calculate the best itinerary for your merchandise movements and identify the most competitive logistician. Our remuneration is based on the savings you will realise (certain conditions apply).

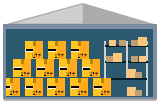

■ TAXATION ON THE SALE OF SERVICES IN CANADA

As a non-resident Service Provider in Canada, you may have the obligation of paying a flat fee of 15% on the income made in Canada. Consult us in order to assess your situation and identify possible alternatives.

■ STORAGE IN CANADA

ASD Group offers its clients an access to its large network of partners in storage solutions (under customs, classic, 3PL, 4PL, etc.) present all over Canada to fulfill your logistical strategy.
