How ASD Can Assist You

CANADA

ASD Canada's network of partners allows us to offer complete services that will meet your customers' needs while offering the simplicity of a single interlocutor.

Tax Representation Non-Resident Importer

Become a non-resident importer in Canada to sell directly to your customers, all taxes included, without creating a local company. ASD Group liaises on your behalf with the tax administration and deals with all mandatory declarations relating to your commercial operations. Offer your customers a ready-to-go solution while remaining competitive.

Local Payroll Solutions and HR

Do you want to hire sales representatives and test the local market? We can select the right profile according to your criteria and help with the coordination. If you send an employee on a mission to Canada, we can handle local formalities to make sure you are in compliance and to offer you peace of mind.

Distribution

Centralize all your administrative duties. As a distributor, ASD Group takes care of importing and distributing goods to your Canadian customers. This eliminates the need to create an on-site subsidiary and to carry out your own tax and customs formalities.

Business Creation

If you wish to create a business in the USA, ASD Group can offer a complete solution from company's creation to accounting and fiscal management of your local operations.
