How **ASD** Can Assist You

UNITED STATES

With the opening of its United States branch, situated in the trade and technology hub of San Francisco (California), ASD Group can now provide hands-on assistance to your business development.

Tax Representation Non Resident Importer (NRI)

If you make sales in the United States, the US tax system may be difficult to understand. ASD Group offers a tax representation service to register your company, collect sales tax and keep records of all transactions, as well as liaising with the authorities. We can deal on your behalf with all the NRI-related administrative procedures.

International Human Resource Management

ASD can be your social representative to manage all administrative matters related to HR, payroll, social security, etc., when you need to hire non-US employees to work on American soil. We can also assist you if you decide to send employees to the US on a work mission.

Business Creation

If you wish to create a business in the USA, ASD Group can offer a complete solution from the company's creation to accounting and fiscal management of your local operations.
